## Coming Soon - New ticketing system on trial

Commencing Monday 16 November 2020, LinkSA will commence trialling a new ticketing system on selected services operating from our Murray Bridge Depot.

These services will include:

**Route 805, 806, 807 and 808** trips operating between Murray Bridge, Mt Barker and Adelaide

**Route 1210-1211** trips operating between Murray Bridge and Mannum

**Please note that your current tickets and passes are still valid for travel and can still be used on these services.**

Our buses will be fitted with new equipment allowing our drivers to conveniently issue customers their tickets based on their boarding and alighting stops (GPS location of bus).

The new system will also allow us to introduce a SmartCard ticketing option. SmartCards will be convenient and easy to use, improve boarding time leading to a faster journey. Customers will also be able to load funds into their SmartCards online.

Another great feature will be the passenger app - allowing customers to track vehicles in real time.

Keep checking our website as more details will be released throughout the trial.
