

UPDATE – LinkSA New Ticketing System Trial

We successfully commenced trialling our new TransportMe ticketing and GPS bus tracking system on Monday, 16 November 2020.

The trial is currently operating on selected services in the Murray Bridge contract service area which includes:

Route 805, 806, 807 and 808 (Murray Bridge and Adelaide services)

Route 1210-1211 (Murray Bridge and Mannum services)

Your current LinkSA tickets are still valid for travel

The new ticketing system allows our staff to conveniently issue customers their tickets based on their boarding and alighting stops.

The new system, once fully integrated will also provide our customers with a convenient and easy to use SmartCard option which will improve boarding time, leading to a faster journey. Customers will also be able to load funds into their SmartCards online.

Another great feature will be the passenger app - allowing customers to track vehicles in real time.

TransportMe is currently in a trial phase with LinkSA and we are keen to hear your thoughts so we can further develop and enhance your travel experience with LinkSA.
